SUMMARY

Frontend Developer with 2+ years building web applications, from enterprise platforms used by thousands to custom products for clients. Led the modernization of a legacy stack to React and TypeScript, focused on fast, accessible, and responsive interfaces that turn manual processes into digital products.

PROFESSIONAL EXPERIENCE

Grupo Salinas – Wellbeing, Communication & Integration

Jan 2025 – Present

Frontend Developer Consultant

Jan 2026 – Present

Frontend Developer Trainee · Dialogus (Grupo Salinas consulting firm)

Jan 2025 – Jan 2026

- Led the modernization of the team's frontend stack from vanilla HTML, CSS, and JavaScript to **React with TypeScript**, introducing Tailwind CSS, Axios, and TanStack Query; used Astro for high-performance landing pages.
- Developed and maintained **15+ enterprise web applications**, new and legacy (civil protection, event management, innovation ideas), replacing Excel-based processes with web systems.
- Built gamified employee campaigns (World Cup Rally, Christmas Rally) serving **10,000–15,000 users** with 10,000+ participations, featuring mini-games, leveling systems, digital cards, and dashboards.
- Delivered microsites for corporate events (Jalmo, Vida y Movimiento) with agendas, registration forms, and responsive landing pages, integrating Google Analytics and SEO optimization.
- Defined JSON API contracts with the .NET backend team and integrated REST APIs using Axios and TanStack Query.
- Worked across the full SDLC in Scrum with Jira: requirements, estimation and roadmap planning, implementation from UX/UI designs, QA, user acceptance testing (UAT), and production deployment.

Freelance Web Developer – Digital event invitations

Dec 2025 – Jul 2026

- Built **multiple custom web invitations** for weddings, baby showers, and gender reveals.
- Implemented countdowns, RSVP, and family voting with **Supabase/PostgreSQL**, plus maps, music, and animations.
- Managed each project with the client: requirements, themed design, revisions, and on-time delivery.

PROJECTS

Cybertracker | React, TypeScript, MediaPipe, Three.js, WebGL

Sep 2026

- Web interface that tracks two hands with **MediaPipe** via webcam to grab, rotate, and scale 3D objects in Three.js.
- Implemented gesture classification, pointer filtering, relative depth estimation, and quaternion rotation.

Domux | React, TypeScript, Supabase, PostgreSQL, TanStack Query, Zustand

May 2026 – Jun 2026

- PWA to coordinate shared households: tasks, groceries, expenses, and budgets, with a summary dashboard.

TECHNICAL SKILLS

Programming: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL, Java, Python

Frontend: React, Angular, Astro, Tailwind CSS, TanStack Query, Zustand, React Router, React Hook Form, Vite, Three.js

Backend & Data: Node.js, Express, REST APIs, Supabase, PostgreSQL, MySQL, MongoDB

Tools: Git, GitHub, Jira, Figma, Google Analytics, SEO, Vitest, ESLint, Vercel, AWS (EC2, S3), Scrum

AI: Claude Code, Codex, OpenCode, Harness Engineering & agent orchestration, LLM integration (Groq)

Languages: Spanish (native), English (C1)

EDUCATION

Universidad Virtual del Estado de Guanajuato (UEG)

2023 – 2026

B.Eng. in Computer Systems Engineering

National Autonomous University of Mexico (UNAM), School of Engineering

2020 – 2023

Electrical and Electronic Engineering · 3 years of coursework

CERTIFICATIONS

- AI-Assisted Development: The New Programmer – MoureDev (2026)
- Full Stack Node.js, React, TypeScript, NestJS & Next.js – Udemy (2026)
- Java Full Stack Developer – Generation México, AIFYC (2024)
- EnglishScore CEFR C1 – British Council (2025)
